Dear Sir/Madam,

Letter of Recommendation for Mr. Ibrahim Bio

I write to recommend Mr. Ibrahim Bio to pursue his Master's degree in Electrical & Computer Engineering at Kean University as he has applied for. My recommendation for Mr. Bio is based on the urgent need for Electrical & Computer Engineering experts in the country. It is very important to mention that in Sierra Leone no higher Education Institution is currently offering post graduate studies in Electrical & Computer Engineering. Thus, such experts are in short supply, posing serious challenges to many national developmental projects. In view of the above, the application of Mr. Bio to pursue Master's degree in Electrical & Computer Engineering is well-timed and very relevant to the needs of the country.

I have known Mr. Bio for over 6 years and have been his mentor throughout his college education. The performance of Mr. Bio during his student tenure was very good, he graduated with a Second-Class Upper Honors degree in Electrical & Electronic Engineering in 2022. He was a consistent and focused worker, highly motivated, innovative, and resourceful.

Mr. Bio showed a very strong potential for research and independent work. His final year project and dissertation was on “**Facial Recognition Door Lock System**”. His research work was very thorough and comprehensive and opened doors for more research avenues.

After graduation Mr. Bio was opportune to work at t Qcell Telecommunication on Company Sierra Leone, as Network Operation Center Engineer, where he also received several capacity building trainings and hands-on practical experience. I am confident that his experience gained over the years should place him in a very strong position to undertake the Masters Programme he has applied for.

His spoken and written English is commendable and this should not pose any problem during his study. He has always been law abiding, diligent and hardworking. He is an invaluable asset to any Industry or academic institution. In light of the above, I wish to strongly recommend Mr. Ibrahim Bio for the Master's degree in Electrical & Computer Engineering he has applied for. If you like to discuss his attributes in more detail, please don't hesitate to contact me.

Thank you for your confidence.

Yours sincerely,
Ing. Dr. Samba Sesay
