**Reference in Support of Dr. Sheriff Kamara's Application for the NSTIC's  
Science Granting Councils Initiative in R&D and Innovations**

I write on behalf of Fourah Bay College, University of Sierra Leone to express support for the above-mentioned application by Dr. Sheriff Kamara. Dr Kamara, a lecturer, has over 10 years experience in teaching, research and supervision of graduate and undergraduate dissertations. Dr Kamara has also consulted with a number of national and international institutions.

In addition, be informed that Dr Kamara is a full time and committed member of faculty of the University of Sierra Leone, and that his contract will be in place for the duration of the Project and beyond. The college administration strongly believes that his proposal on the choice of project to "promote Innovative Energy Solutions that promote supply of clean and affordable energy that, among other benefits, provide access to modern energy is imperative to our national development" is one that is in line with our core mandates of teaching and research, as well as promoting ideals relating to governance and human development.

We strongly support Dr Kamara's application and are happy to provide additional support or information when necessary.

Kindest regards,

Britna Bah  
Deputy Registrar  
Fourah Bay College  
University of Sierra Leone
