I'm unable to create visual diagrams directly. However, I can help you describe the Gantt chart and provide a textual representation of the time schedule, tasks, milestones, and critical path for the research project.

Assumptions:

- The project duration is 24 months.

- The project is divided into four phases: Pre-Project, Data Collection, Data Analysis and Policy Development, and Policy Implementation and Dissemination.

- Tasks within each phase are dependent on the completion of previous tasks.

- Some tasks may overlap or be conducted concurrently to optimize time.

Gantt Chart:

```plaintext
| Task                              | Duration | Start Date | End Date   | Dependencies                |
|-----------------------------------|----------|------------|------------|-----------------------------|
| **Pre-Project Phase**             |          |            |            |                             |
| Stakeholder Mapping and Analysis  | 2 months | Month 1    | Month 2    | -                           |
| Project Introduction Meeting      | 1 month  | Month 2    | Month 3    | Task 1 completion           |
| **Data Collection Phase**         |          |            |            |                             |
| Community Awareness Campaigns     | 4 months | Month 3    | Month 6    | Task 2 completion           |
| Stakeholder Workshops             | 4 months | Month 4    | Month 7    | Task 2 completion           |
| **Data Analysis and Policy Development** | |       |            |            |                             |
| Preliminary Findings Presentation | 2 months | Month 7    | Month 8    | Task 3 completion           |
| Stakeholder Roundtable            | 3 months | Month 8    | Month 10   | Task 4 completion, Task 5 start|
| **Policy Implementation and Dissemination** | |    |            |            |                             |
| Policy Recommendation Launch Event| 2 months | Month 10   | Month 11   | Task 6 completion, Task 7 start|
| Public Awareness Campaign         | 3 months | Month 11   | Month 13   | Task 8 completion           |
| **Post-Project Phase**            |          |            |            |                             |
```

```
| Stakeholder Feedback Surveys        | 2 months | Month 13   | Month 14   | Task 9 completion          |
| Impact Assessment Report            | 2 months | Month 14   | Month 15   | Task 10 completion         |
```

Milestones:

1. Completion of Stakeholder Mapping and Analysis (End of Month 2)

2. Project Introduction Meeting (End of Month 3)

3. Completion of Community Awareness Campaigns (End of Month 6)

4. Preliminary Findings Presentation (End of Month 8)

5. Policy Recommendation Launch Event (End of Month 11)

6. Public Awareness Campaign (End of Month 13)

7. Stakeholder Feedback Surveys (End of Month 14)

8. Impact Assessment Report (End of Month 15)

Critical Path:

The critical path is the sequence of tasks that must be completed on time for the project to finish within the defined timeline. In this case, the critical path includes:

1. Stakeholder Mapping and Analysis (2 months)

2. Project Introduction Meeting (1 month)

3. Community Awareness Campaigns (4 months)

4. Preliminary Findings Presentation (2 months)

5. Stakeholder Roundtable (3 months)

6. Policy Recommendation Launch Event (2 months)

7. Public Awareness Campaign (3 months)

8. Stakeholder Feedback Surveys (2 months)

9. Impact Assessment Report (2 months)

Any delay in these tasks will directly impact the overall project timeline. It's essential to closely monitor and ensure the timely completion of these critical tasks.
